Alkhawaldeh Hosam

BSc in Electrical Power Engineering at BAU

EDUCATION

Balqa'a Applied University – Faculty of Engineering Technology, Jordan – Electrical Power Engineering Bachelor degree, 2020 – 2024.

Yacoub Hashem Basic School

Sep 2013 -Jun 2017 Sep 2018 - Jun 2020
Graduated with a 90.3 GPA.

EXPERIENCE

EDCO (Electricity Distribution Company) Jordan - Engineer in the Specifications Department, Protection Department, Renewable Energy Department, and SCADA Department

March 2024 - July 2024.

- Study, implement and supervise the electrical specifications within international standards such as (IEC, IEEE,...etc.)
- Study electrical faults on the electrical network and work to find innovative solutions to prevent these faults from occurring.
- Conducting electrical examinations of transformers with advanced testing equipment to ensure that they operate as required.

- Visiting electrical cable factories to conduct electrical tests on samples of cables to verify that they are within the required specifications.

Electrical Youth Committee (Jordanian Engineers Association) Jordan - Participated in training courses

February 2023 -present.

- Robust and enhanced educational programs that inspire and prepare future engineers through handson learning experiences.

- **Electrical Power Engineer**

Since my graduation, I have worked for Roya, a company specializing in interior design and decoration. I am responsible for designing, implementing, and directly supervising electrical plans. I have experience ensuring electrical work complies with safety and quality standards, in addition to coordinating with various work teams to achieve the best project results.

SKILLS

Technical Skills

- Electrical electronics: problem solving, distribution systems, low voltage engineering, technical electronics.

-Design software: AutoCAD, SketchUp for photovoltaic systems.

- Conduct advanced examinations of transformers and electrical cables.

Programming Languages

C++

Soft Skills

Coaching, Communication, Presentation, and Teamwork

Courses & Certifications

- Synchrounous Generator - **COMMITTEE OF ENGINEERS WORKING IN THE ELECTRICITY SECTOR** 2024

Projects

Photovoltaic-Thermal (PVT) System – Oct 2024

I completed my graduation project on Photovoltaic-Thermal (PVT) systems at Al-Balqa Applied University. Collaborating with a team, we designed and implemented a system that improves solar panel efficiency by cooling the panels and using the excess heat for steam generation. This project showcased the potential of PVT technology to boost energy efficiency and promote sustainability.
